

Eric J. Morrow
Work Sample
Project: Book Cart
Office: Independent
Date: 2007

This piece is an experiment in materiality and connection. Made of 3/4" Baltic birch veneer plywood, 1" welded tube steel and 3/8" glass; each material will, over time, show its age and patina differently. It was designed to roll conveniently under a 32" desktop or to be pulled out and used as a mobile work surface (perfect for model making). This piece was selected to be shown in the 2007 Burlington Art-Hop.
